WEATHER OF CONCERN

Weather of Concern

- Santa Ana winds will bring critical fire weather conditions to portions of Riverside, San Bernardino, and Orange Counties today.
- Red Flag Warnings have been issued for portions of Los Angeles, Santa Barbara, and Ventura Counties, due to very dry vegetation and critical fire danger.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

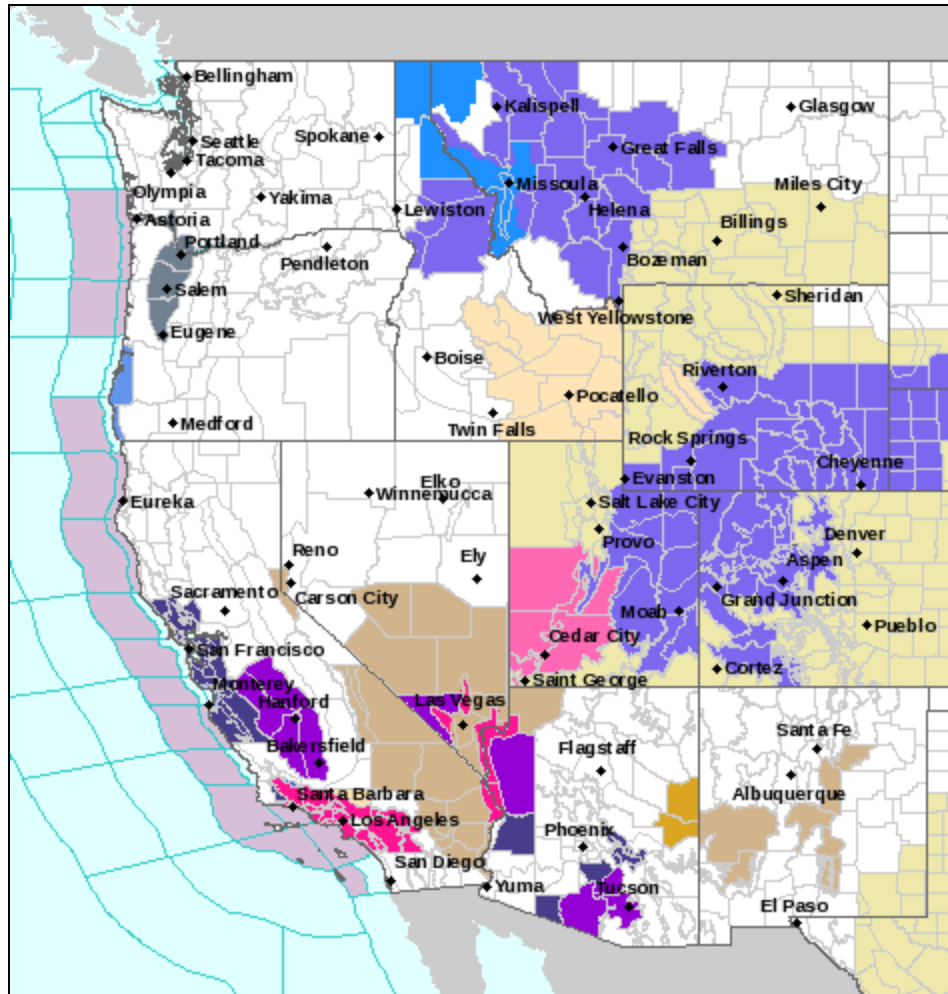

A noticeable N to NW wind flow will affect the area into this morning. Expect N to NE and E wind gusts between 20 to 30 mph with locally up to 40 mph favoring the west slopes of the Cascade and Sierra ranges. Humidity values will be much drier today, although generally above 20%. The lowest humidity values will come tonight and impact the midslope areas, although wind speeds will be light and that lighter wind flow will continue into tomorrow.

The weather models remain consistent with depicting a ridge over the area while also dragging a dry cold front underneath it during the weekend. Gusty N to NE and eventually E winds will affect the area favoring the Saturday night period. This appears to be a real shallow cold push so the strongest downslope winds would favor the west slopes of the Cascade and Sierra ranges with much less effect elsewhere. Thus, afternoon temperatures will warm to above normal status and combine with moderately low humidity. There is still a hint of the ridge getting nudged eastward just enough to allow some modest moisture to enter the region from the Pacific early next week. Confidence remains low at this time although some humidity increases and added cloud cover should occur.

SOUTHERN CALIFORNIA

Minimum humidity will drop into the teens today. Maximum temperatures will be 5 to 10 degrees below normal today, with mid 30s to mid 40s across the mountains and 50s to mid 60s in the valleys. A ridge of high pressure will build into California from the Pacific Ocean bringing a significant warming trend along with minimum humidity in the single digits and teens tomorrow through Monday. Maximum temperatures will reach the low 80s over the warmer valley locations of Southern California Sunday and Monday. Light offshore flow will affect the area tomorrow through Monday. The ridge of high pressure will weaken causing temperatures to cool and humidity to increase Tuesday. The wind flow will become onshore Tuesday.
